FIG. 12B

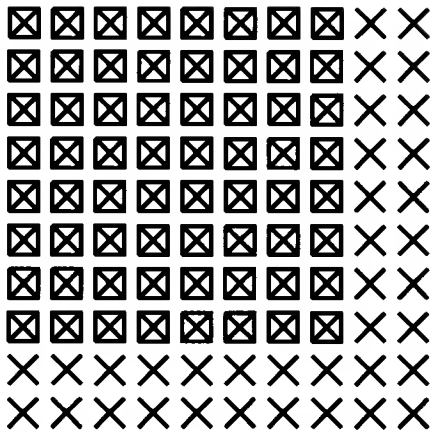

FIG. 13A

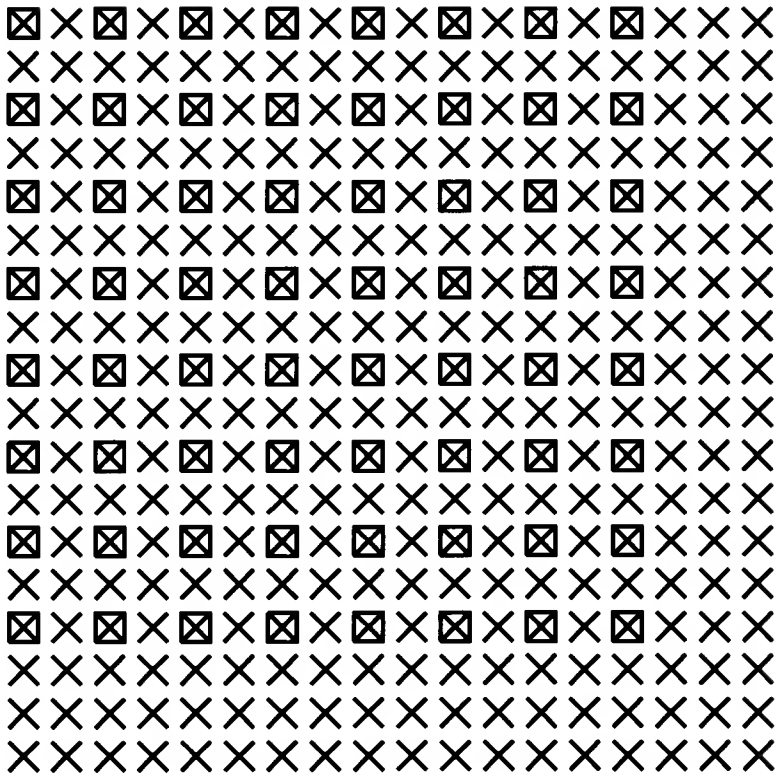

FIG. 13B

Structuring elements for images with different resolutions; the image in FIG. 13A is 320x240 and the image in FIG. 13B is 640x480 (only part of the image samples are shown). The diagram shows the structuring element in the initial location at the upper left corner of the image. The structuring element slides over the image and is shifted by 1 pixel in FIG. 13A and by 2 pixels in FIG. 13B. FIG. 13B corresponds to subsampling of the image by 2 in both directions and subsequently applying the same 8x8 structuring element.
